I. Introduction

The present paper describes the general morphosyntactic annotation principles of the Merovingien Latin corpus of PaLaFra (*Passage du Latin au Francais*¹) and the explicit conditions of use for each single tag. The *lpos* tagset and the annotation style concerning lemmatisation, part of speech (pos) and full morphological tagging is based on the CompHistSem (*Computational Historical Semantics*²) tagset. As most of the available guidelines are made for Classical Latin – like the morphological tagset of the *Index Thomisticus* Treebank (IT-TB)³ –, our main issue was to design a tagset specific to substandard Merowingien Latin texts which differ from Classical Latin in orthographical, morphological and syntactical respects. The annotation scheme *lpos* takes characteristics of Late Latin into account. The Merovingien Latin texts differ from Classical Latin in various respects, therefore, the annotation of problematic cases often requires highly subjective decisions.

II. Lemmatisation

The hierarchy of different levels of abstraction, the **token**, **word**, **lemma**, **classicallemma** and **classicalword** level, is important to carry out effective lexical research on Late Latin texts. Late Latin is extremely fluid, and continuously changing, and therefore many words are spelt in different ways, according to who the author was as well as where and when he was writing. The main issue of Merovingien Latin texts is orthographic variation. Thus, the lemmatisation process takes orthographical characteristics specific to substandard texts into account, which particularly concern the inflectional endings of words. The classical orthography of words (classicallemma) is added according to the lexicon entry of the Latin-German lexicon of Karl Ernst Georges which is available online.⁴

- **token:** The tokens make up the lowest level of a hierarchy of different levels of abstraction. On token level texts are segmented into linguistic units such as words, punctuation, numbers, abbreviations, conjectural emendations etc. (e.g. *Kal*, *April*, *Aecc[lesi]a*, *ORACIONE*, *bystie*, *cohercire*).
- **word:** The word level normalises all capital and lower-case letters especially at the beginning of sentences and in case of all caps (but keeping names or Roman numbers)

(e.g. *oracione*, *bystie*, *choercire*), normalises abbreviations (e.g. *Kalendas*, *Apriles*) and conjectures (e.g. *aecclesia*).

- **lemma:** On lemma level, all inflected word forms are normalised, e.g. verbal word forms are assigned to the first-person singular of the indicative active present (e.g. *choercio*, *persequeo*) or nominal word forms are assigned to the nominative masculine singular (e.g. *aecclesia*, *bystia*, *oracio*).
- **classicallemma:** The multiple different ways of medieval spellings on lemma level are subsumed under a normalised classicallemma which represents the classical spelling of a lemma (e.g. *ecclesia*, *bestia*, *oratio*, *coerceo*).
- **classicalword:** The different spellings of the word level are subsumed under a classicalword. This level offers a standardised spelling of the whole word form and considers the orthographical variations in the ending of the word forms. (e.g. *bestiae*, *coercere*).

The predominant principle is that all word forms are converted to their base form, which is the nominative singular for nouns, the nominative masculine singular for pronouns, adjectives and ordinal numbers, and the first-person singular for verbs. Comparatives and superlatives are redressed to their neutral base forms (e.g. *maior* to *magnus*), gerunds and participles to their first-person singular verb form. Adverbs retain their original form.

III. Morphosyntactic annotation

The *lapos* tagset is structured in different fields: 15 core parts of speech categories (pos) and 13 different morphological features with their specific subcategories.

Part of speech tags (pos)

1. ADJ (adjective)
2. ADV (adverb)
3. NUM (cardinal number)
4. CON (conjunction)
5. DIST (distributive number)
6. FM (foreign material)
7. ITJ (interjection)
8. XY (non word)

9. NN (normal noun)
10. ORD (ordinal number)
11. NP (personal name)
12. AP (adposition)
13. PRO (pronoun)
14. NE (named entity)
15. V (verb)

IV. Challenges related to the annotation of Late Latin texts

Orthographical deviations

- Apocope or loss of the final *-m* (*que ad modum* vs. *quem ad modum*)
- Ambiguity between *ae* and *e* (e.g. *etas* vs. *aetas* or *saeviaebat* vs. *saeviebat*, *assiduae* vs. *assidue*)
- The alteration between *-ti-* and *-ci-* caused by lenition (e.g. *amiciciae* vs. *amiticiae*)
- Alteration between *e* and *i* (e.g. *quolebet* vs. *quolibet*, *quieti* vs. *quiete*)
- Alteration between *o* and *u* (e.g. *postolatur* vs. *postulator*, *pericolo* vs. *periculo*)
- Omission or addition of initial *h-* (e.g. *habundanter* vs. *abundanter*, or *ebdomada* vs. *hebdomada*, *onos* vs. *honos*, *uius* vs. *huius*)
- Missing assimilation of prefixes (*inruerunt* vs. *irruerunt*, *conlocati* vs. *collocati*)

- More frequent syncopation of *-vi-*, especially in verbs in the perfect and pluperfect tense (*expetissint* vs. *expetivissent*)
- Strengthened aspiration or fortition (e.g. *michi* vs. *mihi* or *nichil* vs. *nihil*)
- The intrusion of *-p-* after an *-m-* (e.g. *hiemps* vs. *hiems*, or *dampnum* vs. *damnum*)

The main challenge concerning annotation of medieval texts is the orthographic variation of words, which often affects the case-endings of words. The classicallemma and the classicalword take all different types of spelling deviations into account by normalising the non-Classical spelling variations in the stem and the word endings according to the classical norm (see II).

In Classical Latin, a special word form can be assigned to a special function. In Late Latin, however, the equivalence between form and function is often not transparent by reason of phonological and morphological slips. Clear orthographical variations of the inflectional endings of words, standing for standard casus forms and clearly deduced from the corresponding standard Latin word form used in the same function, are annotated according to their function in the text:

- casus=NOMINATIVE: *Chrodoaldus [...] ditatos* (for standard *Chridoaldus [...] ditatus*)
- casus=GENITIVE: *maiores domus* (for standard *maioris domus*)
- casus=DATIVE: *virtute nostrae non evadit* (for standard *virtuti nostrae non evadit*)
- casus=ACCUSATIVE: *altercationis* (for standard *altercationes*), *ducis* (for standard *duces*)
- casus=ACCUSATIVE: *aureus* (for standard *aureos*), *infra murus* (for standard *infra muros*)
- casus=ABLATIVE: *de gente nobile* (for standard *de gente nobili*), *de perfecta quieti* (for standard *de perfecta quiete*)

All missing final *-m* of Late Latin accusative forms are labelled as casus=OBLIQUE:

- casus=OBLIQUE: *post anno tercio* (for standard *post annum tertium*), *contra Adalulfu* (for standard *contra Adalulfum*), *ad baseleca* (for standard *ad basilicam*)

Grammatical deviations (e.g. gender change, declension change, conjugation change etc.)

If there is no relation between the Late Latin word form and the functionally required Classical Latin form, the substandard word is given a purely formal annotation (according to the form as it is in the text) and is assigned to a non-Classical deviation (see 18). We count among

grammatical variations in Late Latin texts for example non-Classical case use with preposition (*pro uno hominem, de generationem*), non-Classical use of gender (e.g. *vestro quieti*), mode (e.g. *ut/ne/si* clauses or indirect speech without subjunctive), diathesis (*ingredire* for *ingredi*), number (e.g. *omnis populus ibidem commanentes*), preposition (e.g. **in** *exilio damnare*), declension (e.g. *villabus, certaminem*), conjugation (e.g. *spondidit*) and the use of substandard absolute constructions such as accusative absolute or nominative absolute. Word forms which show changes of diathesis, changes of declension and of conjugation are lemmatised under the corresponding Classical Latin lemma and word form (classicallemma, classicalword), e.g. *spondidit* (classicallemma: *spondeo*, classicalword: *spopondit*).

Personal names (NP)

For personal names, it is difficult to establish correct and normalised Classical Latin spellings because of the wide range of spelling variations throughout the whole corpus and also within a single text (e.g. *Sigebertus, Siggibertus, Sighibertus, Sigibertus, Sigyberthu, Sigybertus, Sygiberthus, Sygibertus*). Likewise, there are many personal names of Germanic origin (e.g. *Waratto, Richarid, Vulfos*) without any established standard Latin orthographe. In addition, etymologically identical personal names appear in different declension types in the corpus (e.g. *Drocus, i* vs. *Drogo, onis; Radegunda* vs. *Radegundis; David, idis* vs. *David indecl.*). For these reasons, it is difficult to decide which spelling variant is more reasonable or justified than the other and to determine a standardised classicallemma and classicalword. Since there is a lack of standard forms for personal names, we created some general lemmatisation-guidelines to guarantee at least a uniform lemmatisation of names throughout the corpus:

- The normalised form of the prefix *Vulf-* is *Wulf-* (e.g. *Vulfoaldus* → *Wulfowaldus*). The spelling variations *-ulfus/-vulfus* are subsumed under the suffix *-wulfus* on the classicallemma level (e.g. *Berulfus* → *Berwulfus*).
- The normalised spelling of the suffixes *-oaldus/-valdus/-aldus* is *-waldus* (e.g. *Ansovaldus/Ansoaldus* → *Ansowaldus*).
- The normalised spelling of *-ghisil/-gisil-* is *-gisil-* (without *h*) (e.g. *Godeghiselus* → *Godegisilus*).
- The standardised suffix of *-vera* is *-wera* (e.g. *Audovera* → *Audowera*).
- The normalised form of *Berth-/Bert-* is *Bert-* (e.g. *Berthefredus/Berthefredus* → *Bertefridus*); the suffixes *-berthus/-bertus* are subsumed under the suffix *-bertus* (without *h*).

- The suffixes *-vechus/-vius/-veus* are subsumed under *-wicus* on classicallemma level (e.g. *Merovechus/Merovius* → *Merowicus*).
- The standardised form of *Fred-* is *Frid-*. The normalised suffix of *-fredus* is *-fridus* (e.g. *Ermenfredus* → *Ermenfridus*).
- Personal names of Greek origine which follow the Greek declension are labelled as **declensiontype=GREEK_DECLENSION** (e.g. *Andreas*, *Aristarchos*).

V. Principles of annotation

1. Definition of the tagset

The annotation concerns the parts of speech (pos) and morphological features. The pos correspond with the classic parts of speech. Nine different inflected or variable parts of speech are distinguished (NN, NE, NP, ADJ, PRO, NUM, DIST, ORD, V) and seven uninflected or invariable parts of speech (ADV, AP, CON, PTC, ITJ, XY, FM). In principle, each word form is functionally labeled with its specific morphological features. Depending on the context, the adjectival and substantival use is distinguished for ADJ, PRO, NUM, DIST and ORD.

2. ADJ: adjective

2.1 Morphological features

Adjectives modify in six different morphological categories: **casus**, **genus**, **numerus**, **declensiontype**, **comparisondegree** and **use**.

2.2 casus, genus, numerus

Adjectives' endings (such as nouns, pronouns and participles) alter to show grammatical case. Non-Classical Latin accusative forms (apocope of the final *-m*) are classified into the category OBLIQUE. Adjectives are annotated with their gender (MASCULINE, FEMININE or NEUTER and number (SINGULAR, PLURAL).

morphological feature	subcategory	example
casus	NOMINATIVE GENITIVE DATIVE ACCUSATIVE VOCATIVE ABLATIVE OBLIQUE INDECLINABLE	<i>bonus, omnis</i> <i>atrocis</i> <i>acri</i> <i>veterem</i> <i>grave</i> <i>aspero</i> <i>bona(m)</i> <i>frugi, nequam</i>
genus	MASCULINE FEMININE NEUTER	<i>liber</i> <i>misera</i> <i>tenerum</i>
nummerus	SINGULAR PLURAL	<i>vetus</i> <i>atroces</i>

2.3 declensiontype

There are first (*a* stems), second (*o* stems) and third declension (consonant stems) adjectives. Adjectives in the first group are declined like nouns of the *a*- and *o*-declension, whereas adjectives of in the second group are declined like nouns of the third declension.

morphological feature	subcategory	example
declensiontype	FIRST_DECLENSION SECOND_DECLENSION THIRD_DECLENSION INDECLINABLE	<i>usque ad vespertina ora</i> (Visio Baronti) <i>beatus Petrus</i> (Visio Baronti) <i>Quem gravis molestia pene</i> <i>usque ad mortem perduxerat</i> [...]. (Visio Baronti) <i>E.g. frugi, nequam</i> <i>Recedite, spiritus nequam;</i> (Visio Baronti)

2.4 comparisondegree

An adjective is annotated with its degrees of comparison: the category POSITIVE is the form of the adjective as given in the dictionary, the COMPARATIVE, indicating an increased quality or quantity, and the SUPERLATIVE indicates the utmost degree.

→ [...] *fratres karissimi* [...]. (Viso Baronti)

→ *Deinde ad locum designatum pariter eos pergere ortans, ipse pro proditore prior cunctis accedit* [...]. (Vita Eligii)

→ *Erat enim ceteris humilior, quietus, ut supra dixi, in sermone, hilaris in vultu* [...].

(Vita Wandregiseli)

Remark

In the lemmatisation process, comparatives and superlatives of adjectives are redressed to their neutral base forms (positive). For the lemmatisation of compared irregular adjectives see Annex 4.

2.5 use

Adjectives are annotated according to their (semantico-)syntactic function. Depending on the context, adjectives may be used substantively (and thus function as nouns) or as adjectives in a specific context.

morphological feature	subcategory	example
use	ADJECTIVAL SUBSTANTIVAL	<p>[...] <i>fratres karissimi</i> [...]. --	--

2.6 Special cases

- Some **adjectival participles** (marked as **PAdi** in the German-Latin dictionary of Karl Ernest Georges⁵) partially lost the connection to the verb and may share properties of adjectives. In spite of the adjective properties, adjectival participles are treated as participles and are tagged as pos=V mood=PARTICIPLE, such as *abstinens, arrogans, diligens, florens, excellens, nocens, patiens, ardens, praeceps, libens, egens, flagrans, imminens, pollens, sapiens, situs, diversus, contemptus, doctus, perditus* etc.
→ [...] *humilis atque sapiens* [...]. (Vita Austrigisili)
→ *Erat quidem corpore pulcher, sed pulchrior mente pollensque castitatem.* (Vita Boniti)
→ *Nam infra urbem nullus fere egens erat* [...]. (Vita Desiderii)
- Some words function both, as adjectives or as nouns, such as *adolescens, iuvenis, infans, senex* etc. These words are tagged according to their use as pos>NN if they are used as nouns and as pos=ADJ if they are used as adjectives.
→ *Alio quoque tempore adolescens quidam nomine Ruccolenus* [...]. (Vita Desiderii)
- The Latin **pronominal adjectives** *ullus, nullus, uter, neuter, alter, alias, solus, totus* are categorized as indefinite pronouns (pos=PRO prounotype=INDEFINITE) (see 15.3).
- *Qualis, quantus, talis* and *tantus* are marked as correlative pronouns (pos=PRO prounotype=CORRELATIVE) (see 15.3).
- **Names of months** (e.g. *mensis Ianuarius/Febrarius/Martius/Aprilis* etc.) are adjectives in Latin, they are tagged as ADJ.

3. ADV: adverb

3.1 Morphological features

Adverbs constitute a diverse group of words that may modify verbs, adjectives and other adverbs. All adverbs (also non-gradable adverbs) modify in one morphological category: **comparisondegree**.

- [...] *feliceter remeavit in Galliis.* (Vita Amandi)
→ *Qui multum iurat, non effugiet peccatum.* (Vita Austrigisili)
→ *Rursumque post multos dies crebro ad virum Dei veniens* [...]. (Vita Pardulfi)

⁵ <http://www.zeno.org/Georges-1913>.

- *Coepit paulatim liquor guttatum succrescere et in pavimento rivolus dilabere.* (Vita Eucherii)
- [...] *coepit eum bis terque appellare.* (Visio Baronti)
- *Praeterea vir beatus habebat amicum fidelissimum quendam inclausum nomine Arnanum.* (Vita Desiderii)
- *Sic demum, funditus morbo expulso, sanitatem pristinam indeptus, ad locum proprium rediit.* (Vita Desiderii)

Correlative adverbs have a close relation with each other regarding their meaning and often to their form, such as *ubi* (*relative*), *unde* (*relative*), *ut* (*relative*), *ut/sicut/quomodo*, *quam*, *ibi*, *itaque*, *ergo*, *proinde*, *iam*, *igitur*, *inde*, *eo*, *ea*, *tum*, *ita*, *sic*, *tam*, *alicubi*, *alicunde*, *aliquo*, *aliquando* etc. (see Annex 1).

- *Unde venis, inique, quo pergis, quid facere obtas?* (Vita Austrigisili)
- *Erat enim ceteris humilior, quietus, ut supra dixi, [...]* (Vita Wandregiseli)
- *Exinde processit partibus Spaniae, ubi Dominus per eum operatus est grande miraculum.* (Vita Audoini)
- *Contigit aliquando, ut iter ageret per pagum Andegavo.* (Vita Audoini)

Remarks

- **Interrogative particles** such as *-ne*, *num*, *nonne*, *utrum* and *an* are considered as interrogative adverbs (pos=ADV).
- → *Nonne vides eam in manibus suis?* (Vita Austrigisili)
- Some words function both as **adverb** and as **preposition**: *palam*, *clam*, *super*, *ante*, *post*, *propter*, *infra*, *supra*, *contra*, *extra*, *circum* etc. are annotated as pos=ADV if they are used as adverbs, as pos=AP if they are used as prepositions.
- → [...] *ut supra dictum est [...].* (Vita Desiderii)
- → *De morte Flavadi ab eo ante praedicta.* (Vita Eligii)
- ***Ubi*, *ut* and *vel*** are annotated according to their function in the text as pos=ADV or pos=CON (see Annexe 2).
- **Numeral adverbs** (*semel*, *bis*, *ter*, *centiens* etc.) are annotated as pos=ADV.

3.2 comparisondegree

All adverbs are annotated with their degrees of comparison. POSITIVE, COMPARATIVE and SUPERLATIVE forms are possible for gradable adverbs derived from adjectives. All adverbs without comparative or superlative forms are annotated as comparisondegree=POSITIVE.

- [...] sed *exigua*, quas didici a narrantibus, silere **minime** audebo. (*Vita Eucherii*)
→ Sed *sanctus vir saepius* Dominum deprecabat [...]. (*Vita Audoini*)

4. NUM: cardinal number

4.1 Morphological features

The NUM-tag covers all cardinal numbers that represent a countable quantity. The NUM-tag is used for cardinal digits (II/2) and cardinal word numerals (*duo*). Digits (II/2) receive no morphological annotation.⁶ Cardinal word numbers are annotated with their **casus**, **genus**, **numerus**, **declensiontype** and **use**.

- Tunc **unus** ex illis affatus ait [...]. (*Vita Hugberti*)
→ Tunc *sanctus Rafahel* arcessivit **unum** ex angelis. (*Viso Baronti*)
→ **Tres** mulieres habuit, quod ei non licuerat [...]. (*Viso Baronti*)
→ haec est praetiumdivitis et pauperis **XII** solidi. (*Visio Baronti*)

4.2 casus, genus, numerus, declensiontype, use

Most cardinal word numerals behave as indeclinable adjectives (INDECLINABLE), the exceptions are *unus*, *duo* (FIRST_DECLENSION or SECOND_DECLENSION), *tres* (THIRD_DECLENSION) and multiples of *centum* (FIRST_DECLENSION or SECOND_DECLENSION), all of which decline. The numerals from two thousand up are not adjectives but are forms by means of the plural declinable noun *milia*, *milium* (THIRD_DECLENSION).

⁶ In the Excel sheet we distinguish between NUM_WORD for word numerals (*duo*) which require a morphological annotation, and NUM_DIGIT for cardinal digits (II/2).

morphological feature	subcategory	example
casus	NOMINATIVE GENITIVE DATIVE ACCUSATIVE ABLATIVE OBlique INDECLINABLE	<i>unus</i> <i>duarum</i> <i>tribus</i> <i>unam</i> <i>uno</i> <i>una(m)</i> <i>undecim</i>
genus	MASCULINE FEMININE NEUTER	<i>duobus</i> <i>trecentae</i> <i>unum, nongenta</i>

use	ADJECTIVAL SUBSTANTIVAL	<i>Tres mulieres habuit, quod ei non licuerat [...].</i> (Visio Baronti) <i>Tunc unus ex illis affatus ait [...].</i> (Vita Hugberti)

5. CON: conjunction

The CON-tag belongs to the uninflected or invariable parts of speech. Coordination conjunctions join two expressions or two clauses at the same level. Subordinating conjunctions connect a clause at a lower level to a clause one level deeper.

Coordinating conjunctions are tagged as pos=CON such as *aut, vel, sive, sed, autem, tamen, nam, enim, et...et, neque...neque, non solum...sed etiam, -que, -ve* etc. (see Annex 1).

→ [...] *aperte cognoscite, non est vester socius, sed noster.* (Visio Baronti)

→ *Fratres, nolite diligere mundum neque ea quae in mundo sunt.* (Visio Baronti)

Subordinating conjunctions are tagged as pos=CON such as *antequam, cum, donec, dum, dummodo, etsi, postquam, priusquam, antequam, quamvis, quoad, quia/quod, simul ac/atque, ut, ubi* etc. (see Annex 1)

→ *Obsecro te, ut largiaris benedictionem tuam ex ore tuo super me, priusquam discedas a me.* (Vita Eucherii)

Remark

Ubi*, *ut* and *vel are annotated according to their function in the text as pos=ADV or pos=CON (see Annexe 2).

6. DIST: distributive number

6.1. Morphological features

A distributive number denotes a number that belongs to each of several groups. Distributive numbers are annotated with the grammatical features **casus**, **genus**, **numerus**, **declensiontype** and **use**.

→ *Dumque ita stantes singuli obstupescerent eventum rei [...].* (Vita Eligii)

→ *Quater sena centra decora, inferius superius conexa, surgent celsaque fastigia micant.* (Vita Boniti)

6.2 casus, genus, numerus, declensiontype, use

Distributive numbers are declined like the standard first and second declension plural adjectives.

7. FM: foreign material

All foreign material is sorted into this category. The FM-tag is used for all words that don't concern the linguistic analysis of the corpus (e.g. ancient Greek words).

- *anthropos*
- *cagaton*
- *homostitios*

8. ITJ: interjection

An interjection is a word that is often used as an exclamation and express an emotional reaction, such as *o*, *en*, *vah*, *heu*, *vae* or *eia*.

- *O virtus abstinentiae et mortificatio carnis, quae ad caelos mittis milites Christi!*
(Vita Audoini)
- *En, unus illorum est in pelago, cui numquam nocere potero [...].* (Vita Galli Wettino)
- *'Eia', inquit Eligius, 'eia, probabis hoc in die illa, cum te illuc coram populis et principibus visurus sum in palam'.* (Vita Eligii)

Remark

Ecce is labelled as pos=ADV (see Annexe 1).

9. XY: non word

In the CompHistSem tagset, a non word is a word that is not recognised or accepted as legitimate, as one produced by a spelling or typographical error (OCR error). It is a word whose meaning or use is not approved in a given circumstance.

- *H20*
- *n*men*

In the PaLaFra tagset, the tag XY is used for incomprehensible tokens that can't be assigned a real part of speech category, and that may not be annotated as foreign material (pos=FM see 7).

- *ava* (aus *ab* + *via*) (Epistolae Austrasicae)

→ *aso* (Formulae Andecavenses)

10. NN: normal noun

10.1 Morphological features

The category of nouns is further split into normal nouns, personal names (see 13) which refer to an individual person, and named entities (see 16) which refer to a river, region, nation or hill. Normal nouns – common nouns which don't denote an individual entity – modify in four different morphological categories: **casus**, **genus**, **numerus** and **declensiontype**.

10.2 casus, genus, numerus

As adjectives, pronouns and participles, nouns' endings alter to show grammatical case: ABLATIVE, ACCUSATIVE, DATIVE, GENITIVE, NOMINATIVE or VOCATIVE. Furthermore, indeclinable nouns are tagged as INDECLINABLE in the categories **casus** and **declensiontype**, locatives are categorized as LOCATIVE and non-Classical Latin accusative forms (apocope of the final *-m*) are classified into the category OBLIQUE.

The **genus** category may be MASCULINE, FEMININE or NEUTER, the category **numerus** may be modified in SINGULAR or PLURAL.

morphological feature	subcategory	example
casus	NOMINATIVE	<i>Ubi est illa puerilla, quam ospes noster accepit?</i> (Vita Austrigisili)
	GENITIVE	<i>[...] ita ut magnarum fluminum alvei siccitatis squalore torrerent [...].</i> (Vita Boniti)
	DATIVE	<i>Mox, absolutis membris, pristinae sanitati ac usui cotidiano restitutus probatur.</i> (Vita Austrigisili)
	ACCUSATIVE	<i>Lugdunensem pervenisset in urbem [...].</i> (Vita Boniti)
	VOCATIVE	<i>Venite, fili, audite me;</i> (Visio Baronti) <i>Gloria tibi, Deus!</i> (Visio Baronti) <i>Redime te, frater!</i> (Visio Baronti)
	ABLATIVE	<i>Eodem tempore sub Theoderico principe Pippinus regni primatum tenens atque curam palacii gerens [...].</i> (Vita Boniti)

	LOCATIVE	<i>nullus monachus domi resedit, qui non obviam pastori procederet.</i> (Vita Desiderii)
	OBLIQUE	<i>Et usque ad tertia ora cedentes me audaciter [...].</i> (Visio Baronti) <i>[...] ad superna patria festinabat.</i> (Vita Audoini) <i>Tunc tremefactus frater, ad cottidiana arma conversus [...].</i> (Visio Baronti) <i>[...] Attela Chunorum regem sevitia superatum Gallia provintia coepisse vastare [...].</i> (Vita Genovefae) <i>[...] qua ultione percussi sunt illi, qui hoc nefas perpetrarunt.</i> (Vita Trudonis)
	INDECLINABLE	<i>Si vis vivere vel usque mane, presentialiter redde quod inde habes.</i> (Vita Austrigisili)
genus	MASCULINE	<i>nauta</i>
	FEMININE	<i>puella</i>
	NEUTER	<i>periculum</i>
nummerus	SINGULAR	<i>iter</i>
	PLURAL	<i>gratias</i>

- INDECLINABLE

Indeclinable are all indeclinable neuter nouns such as *cepe, git, gummi, stibi, pondo, nefas, fas, vale, sinapi, mane* or *gausape*.

- LOCATIVE

Nouns that use the locative instead of a preposition. The locative is confined to a few Latin nouns: e.g. *domi, ruri* and *humo*.

- OBLIQUE

Non-Classical Latin accusative forms (apocope of the final *-m*) are classified into the category OBLIQUE: e.g. *(infra) monitione*

10.3 declensiontype

Normal nouns are tagged with their specific decensiontype on the basis of their inflectional endings. The declensiontypes are subdivided into first declension (*-a* stem declension), second declension (*-o* stem declension), third declension (consonant stems and vowel stems), fourth declension (*-u* stems), fifth declension (*-e* stem declension) and indeclinable nouns.

morphological feature	subcategory	example
declensiontype	FIRST_DECLENSION	<i>Illa summo rerum creatori domino Iesu Christo gratias referens [...]. (Vita Sadalbergae)</i> <i>Nautae vero, misso in pelago rete, eundem piscem coeperunt. (Vita Amandi)</i>
	SECOND_DECLENSION	<i>quod periculum nos deinceps vidimus. (Vita Sadalbergae)</i>
	THIRD_DECLENSION	<i>quem postea et comitem itineris et socium laboris habuit. (Vita Sadalbergae)</i>
	FOURTH_DECLENSION	<i>Mox, absolutis membris, pristinae sanitati ac usui cotidiano restitutus probatur. (Vita Austrigisili)</i>
	FIFTH_DECLENSION	<i>Mira res et vehementer supenda! (Vita Desiderii)</i> <i>Fraudolenus presbyter, qui dies suos bene custodivit; (Visio Baronti)</i>
	INDECLINABLE	All indeclinable neuter nouns such as <i>cepe, git, gummi, stibi, pondo, nefas, fas, vale, sinapi, mane</i> or <i>gausape</i> (see above 10.1).

10.4 Special cases

- The singular and plural forms of *Deus/deus, Filius/filius, Pater/pater, Dominus/dominus* and *Spiritus/spiritus* are tagged as NN even if these nouns are written in majuscule like personal names.
 → *Et fratres gratias **Deo** referent pro eius oboedientia.* (Visio Baronti)
 → [...] sed si **Pater** caelestis voluerit, adhuc illuc remeavit. (Visio Baronti)
 → *Clamat et admonet **Dominus** per prophetam.* (Visio Baronti)
- Some words function both as adjective and as noun, such as *adolescens, iuvenis, infans, senex* etc. These words are marked as pos=NN if they are used as nouns, they are categorized as pos=ADJ if they are used as adjectives.
 → *Alio quoque tempore **adolescens** quidam nomine Ruccolenus [...].* (Vita Desiderii)

11. ORD: ordinal number

Ordinal numbers determine in what order a series of things is. The ORD-tag is used for ordinal digits (II./2.) and ordinal word numerals (*secundus*). The section numbering of the texts is marked as ordinal number. Ordinal digits (II./2.) receive no morphological annotation.⁷

→ *Mox, expleta oratione, venimus ad secundam portam paradysi [...].* (Viso Baronti)

→ *Mox, aperto euangelio, hoc primum verbum invenerunt [...].* (Vita Hugberti)

→ *Acta sunt haec omnia VIII. Kal. April. in sexto anno regnante Theoderico regem Francorum.* (Visio Baronti)

11.1 Morphological features

Ordinal word numbers modify in five different morphological subcategories: **casus**, **genus**, **numerus**, **declensiontype** and **use**. Ordinal numbers are declined like the standard first and second declension adjectives.

morphological feature	subcategory	example
casus	NOMINATIVE GENITIVE DATIVE ACCUSATIVE VOCATIVE ABLATIVE OBLIQUE	<i>quartus</i> <i>primorum</i> <i>millesimo</i> <i>undecimos</i> <i>quarti</i> <i>sextis</i> <i>tertia(m)</i>

numerus	SINGULAR PLURAL	<i>quingentesimus</i> <i>ducentesimi</i>
declensiontype	FIRST_DECLENSION SECOND_DECLENSION	<i>secundas</i> <i>septimorum</i>

⁷ In the Excel sheet we distinguish between ORD_WORD for ordinal word numerals (*secundus*) which require a morphological annotation, and ORD_DIGIT for ordinal digits (II/2).

use	ADJECTIVAL	<i>venimus ad secundam portam paradysi [...].</i> (Visio Baronti)
	SUBSTANTIVAL	<i>primi hostium Childevertus rex Leudovaldum episcopum cum primis regni sui dirixit.</i> (Gregor VI)

11.2 Special cases

Non-Classical Latin accusative forms (apocope of the final *-m*) are classified into the category casus=OBLIQUE.

→ *Et usque ad tertia ora cedentes me audaciter [...].* (Visio Baronti)

12. NP: personal name

The NP-tag is used for all anthroponyms, names or part of the names of human beings. Personal names are annotated with their **casus**, **genus**, **numerus** and **declensiontype**.

→ *Pater eius Severus, mater Geroncia vocitata est.* (Vita Genovefae)

→ *Ita demum dominus noster Jesus Christus per servum suum, innovata gratia, replevit aquas Spania.* (Vita Audoini)

→ *Cum esset gentiles Childericus rex Francorum [...].* (Vita Genovefae)

	THIRD_DECLENSION	<i>Cicero</i>
	FOURTH_DECLENSION	<i>Iesus</i>
	INDECLINABLE	<i>Adam, Elisabeth, Judith</i>
	GREEK_DECLENSION	<i>Aeneas, Andreas, Thomas</i>

Remarks

- *Deus/deus, Pater/pater, Dominus/dominus* and *Filius/filius* are annotated as normal nouns (pos=NN) even if these nouns are written like personal names in majuscule.
 → *Et fratres gratias Deo referent pro eius oboedientia [...].* (Visio Baronti)
 → *sed si Pater caelestis voluerit, adhuc illuc remeavit.* (Visio Baronti)
 → *Clamat et admonet Dominus per prophetam [...].* (Visio Baronti)
- Indeclinable personal names are annotated as casus=INDECLINABLE and declensiontype=INDECLINABLE (such as *Adam, Elisabeth, Judith etc.*).
 → *[...] a quo Adam olim victus est in paradysō [...].* (Vita Richarpii)
- Personal names may consist of other parts of speech (such as *Alexander Magnus, Iesus Christus*). Words that belong to other categories (adjectives, verbs etc.) are not annotated as personal names. In the aforementioned examples *Magnus* or *Christus* are pos=ADJ.
 → *Hoc ita Alexander Magnus insigni volumine ad matrem suam scribit [...].* (004_6069.xml)
- For the lemmatisation of the various spellings of personal names see III.

13. AP: adposition

Adposition is a cover term for prepositions and postpositions. A prepositional phrase in Latin is made up of a preposition followed by a noun or a noun phrase in an oblique case. There are few postpositions (such as *causa, gratia, tenus* etc.) that follow a noun or a noun phrase. Prepositions and postpositions are marked as pos=AP.

→ *[...] quadragisisimo die post gloriosam Domini resurrectionem [...].* (Vita Audoini)

- [...] die dominico ante lētaniās **inter** catervas populi, **inter** agmina clericorum, **inter** choros psallentium consecrati sumus gratis **ab** episcopis pariter episcopi [...]. (Vita Eligii)
- [...] rogat sibi deferri **ex** eo oleo quod medendi **gratia** **ante** pignora praefati antestitis dependebat. (Vita Eligii)
- Deinde venimus **ad** tertiam portam paradysi [...]. (Visio Baronti)
- [...] ad predictam parochiam manendi vel maxime orandi **gracia** se contulerunt. (Vita Genovefae)

Remark

Some words (such as *super*, *ante*, *post*, *propter*, *infra*, *supra*, *contra*, *extra*, *circum* etc.) may be annotated as either ADV or AP depending on whether they are used as adverbs or prepositions.

- [...] ut **supra** dictum est [...]. (Vita Desiderii)
- De morte Flavadi ab eo **ante** praedicta. (Vita Eligii)

14. PRO: pronoun

14.1 Morphological features

Pronouns substitute nouns or noun phrases. A pronoun contains its **casus**, **genus**, **numerus**, **declensiontype**, **pronountype** and **use**.

14.2 casus, genus, numerus

Pronouns modify in **casus** (NOMINATIVE, GENITIVE, DATIVE, ACCUSATIVE, ABLATIVE, OBLIQUE and INDECLINABLE; VOCATIVE if possessive pronoun), **genus** (MASCULINE, FEMININE, NEUTER) and **numerus** (SINGULAR, PLURAL).

14.3 pronountype, use

Pronouns are annotated with a pronoun type that further differentiates pronouns into CORRELATIVE, DEMONSTRATIVE, INDEFINITE, INTENSIVE, INTERROGATIVE, PERSONAL, POSSESSIVE, REFLEXIVE and RELATIVE pronouns. Apart from personal pronouns that are only used independently as pronouns, pronouns can occur both as determiners (attributes) (use=ADJECTIVAL) and as pronouns (use=SUSTANTIVAL).

- CORRELATIVE

Correlative pronouns are closely related to each other. Each series contains an interrogative, an indefinite, a demonstrative, a relative, and an indefinite relative pronoun/adjective.

→ *Beversus igitur mensumque lignum repperit tot largius, quot dudum fuerat brevius [...].* (Vita Amati)

→ *Astra non sunt munda in conspectu Dei, quanto magis nos quorum vita temptatio est [...].* (Vita Desiderii)

→ *Quantus sit in calicibus decor, ex distinctione gemmarum nec ipsos intuencium obtutos facile dijudicare reor.* (Vita Desiderii)

		<i>Quoniam, qualis in imperiis fuerit, exposui, referam nunc interiorem ac familiarem vitam.</i>
--	--	--

Remark

There is no **genus** and **numerus** for indeclinable correlative pronouns (such as *tot, quot, totidem, aliquot, quot*).

- DEMONSTRATIVE

There are five demonstrative pronouns (used attributively or independently) indicating a place with respect to the speaker: *hic/haec/hoc, is/ea/id, iste/ista/istud, ille/illa/illud, idem/eadem/idem*. The demonstrative pronouns are declined like adjectives of the first and second declensions.

→ [...] iam non potestis nocere ad **istam** animolam, dum signum sonavit super ipsam ecclesiam, quia fratres congregantur, ut orarent pro **illam** [...]. (Visio Baronti)

numerus	SINGULAR PLURAL	<i>huic</i> <i>has</i>
use	ADJECTIVAL SUBSTANTIVAL	[...] iam non potestis nocere ad istam animolam [...]. (Visio Baronti) <i>dixit hoc: [...]</i>

Remarks

- Latin uses the possessive genitive (*eius, eorum, earum*) of the demonstrative pronoun *is, ea, id* as a **non-reflexive possessive**. In this case *eius, eorum* and

earum are marked as possessive prounouns (pos=PRO pronountype=POSSESSIVE).

→ *Filius decessit. Quotiens cubiculum eius intraret, vivere filium simulabat.*

- For lack of a **non-reflexive personal prounoun** of the third person, Latin uses the demonstrative pronoun *is, ea, id* to refer to the just mentioned person. These word forms are annotated as personal prounouns (pos=PRO pronountype=PERSONAL use=SUSTANTIVAL).

→ *Pater filium vocat. Iulus autem eum non audit.*

- INDEFINITE

Indefinite pronouns such as *aliquis/aliquid* (independent), *aliqui/aliqua/aliquid* (attributive), *ullus/ulla/ullum*, *quidam/quaedam/quiddam*, *quidam/quaedam/quoddam*, *quilibet/quaelibet/quidlibet*, *quivis/quaevis/quidvis*, *quisquam/quicquam*, *uterque/utraque/utrumque*, *neuter/neutra/neutrum*, *nemo*, *nihil* (*nil*).

The Latin **pronominal adjectives** *ullus, nullus, uter, neuter, alter, alius, solus* and *totus* are annotated as indefinite pronouns (pos=PRO, pronountype=INDEFINITE).

Remark

Unus is annotated as a cardinal number (pos=NUM).

→ *Nam sicut non iustificabitur aliquis aliena laude, ita nec ledetur infamia.* (Vita Genovefae)

→ [...] *cuique* ut vocabulum nominis, ita et virtus animi et caelestium gratiarum magnificentia concordabat. (Vita Eligii)

Remark

After short conjunctions (such as *ne*, *ut*, *nisi*, *si*, *num*) *aliqui(s)* is shortened to *qui(s)*. The classical lemma is either *aliquis/aliquid* or *aliqui/aliqua/aliquid* depending on whether the pronoun is used independently or attributively.

- INTENSIVE

The intensive pronoun *ipse*, *ipsa*, *ipsum* is used to intensify the meaning of a noun, but it may also appear alone. *Semetipse*, *semetipsum*, *semetipsi* and *semetipsos* are also annotated as intensive pronouns.

The interrogative pronouns are used strictly for asking questions. They are distinct from the relative pronoun.

→ *Quid possum, bone pastor, donare, quia hic p[re] manibus nihil habeo.* (Visio Baronti)

→ *Quis diceret, eum umquam vel de cibo aut potum esse satiatum?* (Vita Audoini)

- POSSESSIVE

Possessive pronouns are declined like the adjectives of the first and second declension (*a-* and *o-*declensions) with the exception that the vocative masculine singular of *meus* is *mi*. The possessive adjectives are used attributively (*mare nostrum* ‘our sea’), the possessive pronouns are used independently (*nostri* ‘our men’).

Latin lacks a non-reflexive possessive pronoun of the third person. Therefore, it uses the possessive genitive (*eius, eorum, earum*) of the demonstrative pronoun *is, ea, id*, that is classified in this case as a possessive pronoun (pos=PRO prounountype=POSSESSIVE use=ADJECTIVAL).

→ *Benedictus tu, mi pater, quia que desidero sciscitas, si ambio adipisci.* (Vita Genovefae)

→ *Amice, refrena cupiditatem tuam!* (Vita Eligii)

→ *Sed ille frater, manus suas ad latum suum extensas, oculos clusos, coepit semivivus iacere [...].* (Visio Baronti)

Remark

No **declensiontype is marked** for the non-reflexive possessive pronoun of the third person.

- REFLEXIVE

The personal pronoun of the third person is reflexive. The reflexive pronoun refers to the subject of the clause in which it stands or to the subject of the governing clause: *sui, sibi, se, sese, a se, secum.*

→ [...] *ipse sibi servidus milis institerat.* (Vita Audoini)

15. NE: named entity

Named entities or proper names are names or parts of the names of nations, peoples, cities, rivers or hills. Proper names are annotated with their **casus**, **genus**, **numerus** and **declensiontype**.

- Words that belong to other categories (adjectives, nouns etc.) are not annotated as proper names. In the aforementioned examples *Penninas* and *Belgicam* are tagged pos=ADJ.
- **Indeclinable proper names** are tagged casus=INDECLINABLE and declensiontype=INDECLINABLE (such as *Jerusalem, Parisius* etc.).
→ [...] in *Parisius urbem migravit.* (Vita Genovae)
- All **names of ethnic groups** are converted to their baseform, which is the nominative singular (token: *Gothorum* → lemma: *Gothus*)
- **Named entities** may consist of other parts of speech (such as *Lugdunum Clavatum*). Words that belong to other grammatical categories (adjectives, verbs etc.) are not annotated as named entities. In the aforementioned example, *Clavatus* is labelled as pos=V mood=PARTICIPLE.
- **Names of months** (e.g. *mensis Ianuarius/Febrarius/Martius/Aprilis* etc.) are adjectives in Latin, they are labelled as pos=ADJ (see 2).

16. V: verb

16.1 Morphological features

A verb contains its **casus, genus, numerus, person, declensiontype, comparisondegree, mood, tense, voice, verbtype** and the **conjugationtype**.

morphological feature	mood
casus	PARTICIPLE, SUPINE, GERUND, GERUNDIVE
genus	PARTICIPLE, SUPINE, GERUND, GERUNDIVE
numerus	GERUND, GERUNDIVE, IMPERATIVE, INDICATIVE, PARTICIPLE, SUBJUNCTIVE and SUPINE

declensiontype	PARTICIPLE, GERUNDIVE
comparisondegree	PARTICIPLE
tense	all moods <u>except</u> GERUND, GERUNDIVE and SUPINE
voice	all moods <u>except</u> GERUND, GERUNDIVE and SUPINE
verbtype	all moods

conjugationtype	all moods
-----------------	-----------

16.2 casus, genus, numerus, person

Finite verbs are annotated with their **numerus** and **person**.

The personal forms of finite verbs refer to an expressed or understood subject of first person (FIRST_PERSON), second person (SECOND_PERSON) and third person (THIRD_PERSON). Furthermore, they express a numerus (SINGULAR, PLURAL).

Non-finite verbs are annotated with their **casus**, **genus**, **numerus**.

In the compound tenses (perfective passive tenses and the periphrastic conjugation), the nominal part of the verb agrees with the subject in casus, genus and numerus: the three participles (present active participle, present passive participle, future active participle, the gerund(ive) and the supine) contain a casus, genus and numerus.

16.3 mood

All verbs are annotated with their mood.

- GERUND

The gerund is a verbal noun that is annotated with its **casus** (GENITIVE, DATIVE, ACCUSATIVE, ABLATIVE), **genus** (NEUTER), **verbtype** and **conjugationtype** and **declensiontype**.

→ *Predicando iugiter et multos et innumerabiles in peccatis delapsos ad viam salutis revocabat.* (Vita Hugberti)

→ [...] quodque magis impedirent **contradicendo**, quam consentirent **annuendo**.
(Vita Bertilae)

→ [...] ad predictam parochiam **manendi** vel maxime **orandi** gracia se contulerunt.
(Vita Genovefae)

declensiontype	SECOND_DECLENSION	<i>conradicendo</i>

- GERUNDIVE

The gerundive is a passive verbal adjective. It is annotated with its **casus**, **numerus**, **genus**, **declensiontype**, **verbtype** and **conjugationtype**.

→ *Illud etiam non est praetermittendum [...].* (Vita Amandi)

→ *[...] ut vehicula ad vinum in usibus fratrum monasterio deferendum praeparare deberet [...].* (Vita Amandi)

- IMPERATIVE

The imperative modifies in **numerus**, **person**, **tense** (present imperative and future imperative), **voice**, **verbtype** and **conjugationtype**.

→ *'Christe, adiuva me! Christe, adiuva me!'* (Vita Amandi)

→ *'Vade et dic monacho illi [...].* (Vita Amandi)

	PASSIVE	<i>partiebar</i>

- INFINITIVE

The infinitive is a verbal noun with properties of both verbs and nouns. It is annotated with its **voice**, **tense**, **verbtype** and **conjugationtype**.

- *Longum est enarrare de tantis miraculis.* (Vita Audoini)
- *Memorare vobis volo [...].* (Visio Baronti)
- *Sufficit pauca dixisse de pluribus [...].* (Vita Audoini)
- *Quis diceret, eum umquam vel de cibo aut potum esse satiatum?* (Vita Audoini)

- PARTICIPLE

The participle is a verbal adjective. As for adjectives, pronouns and nouns, it declines for **casus**, **numerus** and **genus**. It is annotated with its **declensiontype**, **comparisondegree**, **tense**, **voice** and **verbtype**. There are three types of participles: the present participle, the past passive participle and the future active participle. Participles that are used as attributive adjectives are also considered as pos=V mood=PARTICIPLE.

- *Protinus Genovefa suspiciens in caelum, manibus expansis, auxilium a Domino precabatur.* (Vita Genovefae)
- *Ex illa hora, fugato demonio, puella illa pristine sanitati restituta est [...].* (Vita Austrigisili)
- *'Eia', inquit Eligius, 'eia, probabis hoc in die illa, cum te illuc coram populis et principibus visurus sum in palam'.* (Vita Eligii)

Remarks

- Some **adjectival participles** partially lost the connection to the verb and may share properties of adjectives. In spite of the adjective properties, adjectival participles are annotated as participles (pos=V mood=PARTICIPLE) (such as *ardens*, *egens*, *flagrans*, *imminens*, *pollens*, *sapiens*, *situs*, *diversus* etc.).
 → [...] *humilis atque sapiens* [...]. (Vita Austrigisili)
 → *Erat quidem corpore pulcher, sed pulchrior mente pollensque castitatem.* (Vita Boniti)
 → *Nam infra urbem nullus fere egens erat [...].* (Vita Desiderii)
 → *Et cum has easdem laudes flagrans amoris magnitudo exigeret [...].* (Vita Eligii)

- **Past participles used as nouns** are annotated as pos=V mood=PARTICIPLE, for example *promissum* (*promitto*), *commissum* (*committo*), *decretum* (*decerno*), *gestum* (*gero*), *placitum* (*placeo*), *stratum* (*sterno*), *factum* (*facio*), *meritum* (*mereo*) etc.
 - All **deverbal nouns of the fourth declension** (e.g. *exerceo* → *exercitus, us*) are tagged pos=NN.
- SUBJUNCTIVE
- Verbs in subjunctive modify in **numerus**, **person**, **tense**, **voice**, **verbtype** and **conjugationtype**. There are four tenses: The present subjunctive, the imperfect subjunctive, the perfect subjunctive and the pluperfect subjunctive.
- *Ne timeas venire ad me!* (Vita Galli Wettino)
- *Et rogavit pontifices, ut per eorum canones eligerent, quem voluissent.* (Vita Galli Wettino)
- *Alio vero tempore cum Eligius monasterium suum in território Lemoveceno visitasset [...] .* (Vita Eligii)

	IMPERFECT	<i>monerentur</i>
	PERFECT	<i>placueritis</i>
	PLUPERFECT	<i>fuissemus</i>
voice	ACTIVE	<i>sis</i>
	PASSIVE	<i>vereamur</i>

- SUPINE

The supine is in form a noun of the fourth declension, annotated with its **casus** (ACCUSATIVE, DATIVE or ABLATIVE), **genus** (NEUTER), **verbtype** and **conjugationtype**.

→ *Sed mirum dictu!* (Vita Richarrii)

morphological feature	subcategory	example

16.4 tense

The categories IMPERATIVE, INDICATIV, INFINITIVE, PARTICIPLE and SUBJUNCTIVE are annotated with their **tense** (see above 17.2).

16.5 voice

The categories IMPERATIVE, INDICATIV, INFINITIVE, PARTICIPLE and SUBJUNCTIVE are annotated with their specific **voice** (ACTIVE or PASSIVE) (see above 17.2).

16.6 verbtype

All verbs are annotated with their **verbtype**. Seven different types of verbs are distinguished.

- DEPONENT

Group of verbs that have passive forms but active meanings. These verbs are annotated as PASSIVE in **voice**.

→ [...] *integralm adeptus est sanitatem.* (Vita Genovefae)

→ *Verum post breve tempus sequitur effectus eius sermonem;* (Vita Eligii)

- IMPERSONAL

Third person singular verb forms without personal subject are conjugated only in the THIRD_PERSON singular and in the infinitive. The token *licuit* is lemmatised under the lemma *licet*.

→ [...] sed, quod dicere **pudet**, egestion naturae turpi impetus prorumpens [...]. (Vita Galli Walahfrido)

→ Tres mulieres habuit, quod ei non **licuerat** [...]. (Viso Baronti)

→ Post haec denique tempus **evenit**, ut [...]. (Vita Romarici)

Remark

Licet is labelled as pos=V mood=IMPERSONAL or as pos=CON depending on whether it is used as an impersonal verb or as a concessive subordinator (see Annex 2).

- INTRANSITIVE

Verbs that do not take any direct object and may not be classified into any other verbtype category (DEPONENT, IMPERSONAL, SEMIDEPONENT, VERBA_ANOMALA or VERBA_DEFECTIVA) are tagged INTRANSITIVE. Perfect passive participles of transitive verbs are annotated verbtype=INTRANSITIVE (except: verba deponentia).

→ Quidam ergo circumstantium partibus filii **favebant** [...]. (Vita Eligii)

→ Imperiis tuis, beatissime papa Dydo, eloquio quidem exiguo, sed voto uberrimo **parere** disposui. (Vita Amati)

- SEMIDEPONENT

Semideponent verbs have active forms in the first two principal parts, but deponent forms in the third principal part: *audere, fidere, gaudere, solere, reverti*.

→ Qui cum cognovisset adventum venerabilis patris, **gavisus** est valde et honorifice suscepit illum [...]. (Vita Trudonis)

→ Quapropter non **audeo** adgredi invalidus in sensu [...]. (Vita Pardulfi)

→ Quem ipse locum utpote care coaemptum unice diligebat et plerumque ibique ad manendum divertere **solitus** erat. (Vita Desiderii)

→ Cui sacerdos, cui id officium commissum erat, orare innixius et **fidere** de merita praesulis monuit. (Vita Desiderii)

- TRANSITIVE

Verbs that take its object in the accusative case, and which may not be classified into any other verbtype category are annotated as TRANSITIVE. Verbs (which may not be classified into any other verbtype category) followed by quotations, indirect questions

or subordinate clauses functioning as direct objects are also considered as TRANSITIVE.

→ *Omnia ista mala, quod dicitis, supercalcavit ista bona.* (Visio Baronti)

→ *Quis, inquit rex, hanc preceptionem dedit?* (Vita Austrigisili Biturigi)

- VERBA_ANOMALA

Verbs that do not form their tenses according to the common rules: such as *esse, edere, ferre, velle, nolle, malle, fieri, ire*. These word forms are annotated without conjugationtype.

→ [...] *ire cum magistri non potuit, ut nobis viam veritatis ostenderet.* (Vita Galli Walahfrido)

→ [...] *licet nolens quidem ad aulam regiam perrexit.* (Vita Wandregiseli)

- VERBA_DEFECTIVA

Verbs that only possess forms in the perfect system, such as *odisse, meminisse, coepisse, aio* and *inquit*. These word forms are annotated without conjugationtype.

→ [...] *et memento mei semper.* (Vita Amati)

→ *Tunc ergo ait ad illos sanctus Rafahel [...].* (Visio Baronti)

16.7 conjugationtype

All verbs are annotated with their conjugationtype except VERBA_ANOMALA and VERBA_DEFECTIVA. The regular verbs may be subdivided into four conjugations: first conjugation (*a*-stems), second conjugation (*ē*-stems), third conjugation (*ě*-stems), fourth conjugation (*i*-stems).

- FIRST_CONJUGATION (*a*-stems)

→ *Super quem sanctus Rafahel oravit prolixè et hunc capitulum aedidit ex ore, dicens [...].* (Visio Baronti)

- SECOND_CONJUGATION (*ē*-stems)

→ *Quid possum, bone pastor, donare, quia hic p[ro]ae manibus nihil habeo.* (Visio Baronti)

- THIRD_CONJUGATION (*ě*-stems)

→ *Sed illi nequaquam adquiescebant [...].* (Visio Baronti)

- FOURTH_CONJUGATION (*i*-stems)

→ [...] *quem iam nullus sperabat audire loqui.* (Visio Baronti)

Remark

oriri is consistently annotated as a fourth conjugation verb because of its present infinitive (even though it can also be listed in the third *i*-stem conjugation).

17. anomaly

Grammatical variations in use of case, gender, number, preposition, mode and diathesis, anacoluthon and the use of absolute constructions such as nominative absolute and accusative absolute in Late Latin texts are marked as deviations of standard Latin.

	description	examples
1.	ACCUSATIVE_ABSOLUTE ⁸	<i>data susceptaque de pace sacramenta pactionibusque firmatis</i>
2.	VARIATION_DIATHESIS	active use of deponents, e.g. <i>ingredire</i>
